

Protocol Distribution

Protocol and Action Matrix

threat_label	protocol	action
benign	FTP	allowed
benign	FTP	blocked
benign	HTTP	allowed
benign	HTTP	blocked
benign	HTTPS	allowed
benign	HTTPS	blocked
benign	ICMP	allowed

Protocol vs Threats

Q&A

1. What network protocols dominate overall traffic patterns?
2. Which protocols present the highest security risk based on blocking rates?
3. What indicators of malicious activity are evident within the network traffic?
4. Which IP addresses and ports require further investigation?
5. What security recommendations can be derived from the analysis?
6. How effective do current security controls appear to be in mitigating suspicious traffic?
